## Education

<b>Monash University</b> Master of Mechanical Engineering	Melbourne, VIC March 2019 – December 2020
<b>Viswajyothi College of Engineering and Technology</b> Bachelor of Technology - Mechanical Engineering	Kerala, India July 2013 – April 2017

## Experience

<b>Automation Systems &amp; Controls Pty Ltd</b> Graduate Commissioning Engineer <ul style="list-style-type: none"><li>Assisted Addverb Technologies in the commissioning of fulfillment center at Derrimut.</li><li>Liaising and collaborating with installation teams to carry out tests and repairs.</li><li>Monitoring, diagnosing, and reporting issues with carton shuttle robot - QUADRON.</li></ul>	Melbourne, VIC March 2022 – April 2022
<b>Southern Dental Industries</b> Machine Operator <ul style="list-style-type: none"><li>Increased powder bottling output by 40% by identifying bottlenecks.</li><li>Preparation and maintenance of records in compliance with GMP principles.</li><li>Troubleshooting of machinery problems as they arise to reduce machinery downtime and increase line efficiency.</li><li>Trained machine operators in changeovers, machine setups, record keeping, and daily operations</li></ul>	Bayswater, VIC March 2021 – March 2022
<b>iBuild Building Solutions</b> Intern <ul style="list-style-type: none"><li>Developed automation script to scrape details from websites.</li><li>Evaluated thermal and electrical requirements for home office pods.</li><li>3D models were designed using Revit and rendered using Lumion.</li><li>Learned invoicing process, architectural designing, sourcing of builders, selection process, etc.</li></ul>	Mulgrave, VIC August 2020 – November 2020
<b>Vibratory weighing filler</b> <ul style="list-style-type: none"><li>Designed and developed a prototype of Vibratory weighing machine</li><li>Achieved percentage accuracy of .8% for a filling weight of 6g</li></ul>	January 2022 – April 2022
<b>Rodent Hoarding Apparatus</b> <ul style="list-style-type: none"><li>The aim was to design an apparatus to measure the amount of food hoarded by individual mice without human intervention for the department of physiology at Monash University.</li><li>A concept design was made in which mouse was identified using injectable RFID tags and their movements were monitored using open-source video analysing software.</li></ul>	January 2021 – September 2021
<b>Automated Boarding Aid for Disabled Passengers on Rail</b> <ul style="list-style-type: none"><li>The project was to design an automated device for bridging the gap.</li><li>A standalone system to accommodate both vertical and horizontal gaps was made which reduces installation complexity, time, and cost.</li></ul>	July 2021 – November 2021

## Skills & Interests

**Technical:** Solidworks, CREO Parametric, MATLAB, ANSYS, ABAQUS, MS Office Suite, Arduino

**Programming:** C++, Python, VBA, SQL, RegEx, Ladder Logic

**Interests:** Designing and building prototypes, 3D printing, Automation, Machine learning
